DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Claims 1-18 are, drawn to an EL display device, classified in class 257, subclass
 72.

II. Claims 19-46, drawn to a method for manufacturing an EL display device, classified in class 438, subclass 149.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the wiring layers may be formed by sputtering, CVD or plasma enhanced methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and vice versa, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group 1:

Application/Control Number: 09/685,698

Art Unit: 2813

Species 1, claims 1,7,13- having pixel rows divided by a gate;

Species 2, claims 2,8,14- having pixel rows divided by a source;

Species 3, claims 3,9,15- having pixel rows divided by a bank over a gate;

Species 4, claims 4,10,16- having pixel rows divided by a bank over a source;

Species 5, claims 5,11,17- having pixel rows divided by a cathode;

Species 6, claims 6,12,18- having pixel rows divided by a banks formed in cathode gaps.

Group II:

Species 1, claims 19, 25, 31, 37- method having pixel rows divided by a gate;

Species 2, claims 20, 26, 32, 38- method having pixel rows divided by a source;

Species 3, claims 21, 27, 33, 39- method having pixel rows divided by a bank over a gate;

Species 4, claims 22, 28, 34, 40- method having pixel rows divided by a bank over a source;

Species 5, claims 23, 29, 35, 41- method having pixel rows divided by a cathode;

Species 6, claims 24, 30, 36, 42- method having pixel rows divided by a banks formed in cathode gaps;

Species 7, claims 43-44, a method having a dispenser and 2 adjacent pixels;

Species 8, claims 45-46, a method having a dispenser with one pixel row.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic.

Application/Control Number: 09/685,698

Art Unit: 2813

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
